"Has been more destructive to human health and life than war, postlience and famine combined." So said a distinguished writer many years ago, and it is as true to-day as then. The poor victim of Blood Disease is drugged with Mercury to cure the malady, and then dosed with locates to care him of the Mercurial Poisoning; but instead of any relief, the first breaks down his general health and makes him a cripple, and the other ruins his digestive organs. To those afflicted in this way Swift a Specific is the greatest boon on earth, and is worth more than its weight in gold. It antidots this Mercurial Poison, tones up the system and brings the sufferer back to health and happiness. Every person who has ever been salivated should by all means take a thorough course of this remedy. JEFFERSONVILLE, Twiggs Co., Ga.

The continued good outlook for heavy grain crops, especially corn, make hogs and hominy cheap, consequently-pork and short ribs. This leads to the outlook for continued lower prices, and while slight reactions are inevitable, they will be only temporary. The market, though, is heavily oversold for October deliveries,

NEW YORK DRY GOODS MARKET.

New York, September 7.—Although scarcely so active as yesterday, there has been a satisfactory volume of trade at first hands. For all classes of goods miscelbeen a satisfactory volume of trade at first hands. For all classes of goods miscellaneous orders and selections are of much steadiness, and from some markets are of growing frequency. This is the best evidence that a large distributing trade is in progress, and that stocks are being much broken. Brown cottons are in good request by converters, and leading styles in steady distribution for jobbing wants.

Five years ago I found on my plantation a colored man who was badly diseased. He stated that five years before he had contracted a violent case of Blood Poison, and had been treated by many physicians, all failing to cure him. I treated him with Swift's Specific, and in a short time he was sound and well, and has not had a symptom of the disease since.
